Animals In Danger

Panda

Where do pandas live?

- Giant pandas live in a few mountain ranges in central China.
- They once lived in lowland areas, but farming, cut down forest, and other development now drove giant pandas to the mountains.

How do pandas look like?

- The giant panda, a black-and-white bear, has a body typical of bears. It has black fur on ears, eye patches, muzzle, legs, and shoulders. The rest of the animal's coat is white.

How do pandas look like?

- Giant pandas have large molar teeth and strong jaw muscles for crushing tough bamboo. Many people find these chunky, lumbering animals to be cute, but giant pandas can be as dangerous as any other bear.

What do Zoo pandas eat?

Zoo pandas eat

- In zoos, giant pandas eat bamboo, sugar cane (сахарный тростник) , rice gruel (жидкую рисовую кашу) , a special high-fiber biscuit, carrots, apples, and sweet potatoes (батат).

How do they spend free time?

- A wild panda spends much of its day resting, feeding (eating), and seeking (looking for) food. Unlike other bears from temperate climates (умеренный климат), giant pandas do not hibernate (впадать в спячку).

Little ones

- At birth, the cub is helpless, and it takes considerable effort on the mother's part to raise it. A newborn cub weighs three to five ounces (= 28,3 г) and is about the size of a stick of butter.
